The challenge of developing Queensland’s coalbed methane resource

by

G.C. Oldroyd and R.A. Brotherton

MIM Holdings Ltd

ABSTRACT

Major field exploration and research work has commenced to assess the commercial potential of coalbed methane in Queensland with MIM being a leading industry participant. The author reviews MIM’s exploration and development plans for coalbed methane and analyses the perceived critical factors which are likely to influence the extent and timing of future development. Technical, commercial, and regulatory factors are discussed.
